Hall Environmental Analysis Lab  
 4901 Hawkins NE Suite D  
 Albuquerque, NM 87109

The Drinking Water Bureau of the New Mexico Environment Department (NMED-DWB) has received and reviewed your NELAP certification /accreditation information from the state of Oregon. The documentation is acceptable and your New Mexico certification is now valid through February 28, 2010.

This certification is to perform drinking water analysis in compliance with the Federal Safe Drinking Water Act, pursuant to 40CFR Part 141, and the New Mexico Environment Department Drinking Water Regulations for the Primary Regulated contaminants, including contaminants as listed in your Oregon Scope Accreditation.

You must advise NMED-DWB of any change in your accreditation by the State of Oregon and continue to provide this office with performance evaluation results. You are also required to provide evidence of renewal of accreditation by the state of Oregon to continue certification past February 28, 2010.

Laboratories certified by New Mexico can be purged from the list if there is no evidence that they are performing drinking water compliance sample analysis for public water supply systems in New Mexico.

If you have any questions or require additional information, please contact me at 505-476-8648.

Sincerely,

Oneva Rivera  
 Lab Coordinator
